

AUTOMATIC SYSTEMS INSTALLS NEW FIRSTLANE AND ACCESSLANE INTO HOUSING ASSOCIATION PROJECT

BACKGROUND

Automatic Systems was asked by Aspex UK Limited to work with them on a project they had won at the head office of Riverside Group.

Riverside is a group of complementary businesses driven by a clear social purpose, with a charitable housing association at its core.

Established over 90 years ago, they have grown to become a major provider of affordable housing, care and support services in England and Scotland, with almost 56,000 homes in management. Operating at scale and across 160 local authorities, their vision is to transform the lives of the 90,000+ people they house and revitalise the neighbourhoods in which they live.

RiversideGroup approached Aspex as a result of Covid to help secure and control the access of their head quarter building.

PROJECT SUMMARY

End user: Riverside Group

Distributor: Aspex UK Limited

Country: UK

Solution: FirstLane speedgates & AccessLane swing gates

AUTOMATIC SYSTEMS

Access controlled...
Future secured

SOLUTION

With the help of Automatic Systems Aspex came up with a solution that fulfilled their criteria. This included the installation of the newly launched FirstLane and AccessLane.

FUTURE WORK

Automatic Systems looks forward to working with Aspex on future projects.

WORK TIMEFRAME

Having worked with Aspex on a number of previous projects Automatic Systems were the preferred supplier when the contract was won in December 2020. Works took a week to complete as allocated in February this year.

FIRSTLANE

The FirstLane swing door speedgate offers unbeatable value for money whilst ensuring safety and quality have not been compromised. Thanks to its black painted steel housing, combined with the elegance of glass, FirstLane speed gate meets stylish and architectural trends. FirstLane provides a high bi-directional flow and safety without compromise. Its exclusive DIRAS detection system ensures precise user tracking for maximum safety and security. Even more intuitive and easy to use thanks to the new dynamic LED lighting, FirstLane combines high throughput with state-of-the-art detection.

ACCESSLANE

A true turn-key solution, the AccessLane swing glass barrier complements any facility that requires wide access in order to accommodate the mobility-impaired, deliveries or bulky objects. A modest and modern look provides a low impact access control solution for any architectural environment.
